

DARLING JACKSON

Systems Engineer | Information Systems Security Officer (ISSO) | Identity & Access Management
Active TS/SCI | CompTIA Security+ ce

📍 Evans, GA | 📞 (954) 558-9586 | ✉ Darling.Jackson1@outlook.com | 💼 linkedin.com/in/darlingjackson

PROFESSIONAL SUMMARY

Systems Engineer and Information Systems Security Officer (ISSO) with more than nine years of military and enterprise IT experience supporting classified DoD environments. Experienced in cloud and on-premises infrastructure, identity and access management, cybersecurity compliance, vulnerability remediation, and technical service delivery. Supported RMF and Authority to Operate efforts across AWS and Azure environments while coordinating with engineering teams, system owners, ISSMs, ISSEs, and mission stakeholders. Proven leadership experience mentoring technical personnel, managing operational priorities, and supporting secure, mission-critical systems.

CORE COMPETENCIES

Identity & Access Management	Cloud & Infrastructure	Cybersecurity & Compliance	Application & Integration
• Keycloak • OIDC / SAML • Active Directory • Role-Based Access Control • User Provisioning	• AWS • Microsoft Azure • VMware • Windows Server • Microsoft 365 • Kubernetes (K8s) • Helm • CI/CD Concepts • Git/Github/Gitlab	• RMF • NIST SP 800-53 • STIGs • ACAS / eMASS • Authority to Operate (ATO) • Vulnerability Management • Security Operations • Continuous Monitoring (ISCM) • POA&M Management	• Application Onboarding • API Authentication Validation • Authentication Workflows Tools & Platforms • Jira • Confluence • SharePoint • Postman

PROFESSIONAL EXPERIENCE

Systems Engineer / Information Systems Security Officer ISSO

Booz Allen Hamilton | Fort Liberty, NC

Apr 2023 – Sep 2024

- Maintained and supported classified infrastructure within a JSOC environment, ensuring secure and reliable system operations.
- Supported the deployment, migration, and troubleshooting of Keycloak in Kubernetes environments using Helm.
- Managed Keycloak identity and access management, including user accounts, realms, roles, and authentication workflows.
- Conducted technical reviews for application onboarding to ensure secure authentication, authorization, and integration requirements were met.
- Supported AWS and Azure Authority to Operate (ATO) efforts by validating security controls and collaborating with engineering and cybersecurity teams to maintain compliance.
- Administered Active Directory, including user provisioning, permissions, and Group Policy management.
- Assisted in troubleshooting Keycloak upgrade issues by reviewing deployment configurations and database connectivity.
- Collaborated with engineers, cybersecurity teams, ISSMs, ISSEs, and system owners to support RMF activities, cloud security initiatives, and secure identity integration using OIDC and SAML.
- Performed API authentication validation and integration testing using Postman.
- Supported the Risk Management Framework (RMF) lifecycle, including system categorization, security control implementation, assessment, authorization, and continuous monitoring.
- Developed and maintained Authorization and Assessment (A&A) packages in eMASS, including artifact collection, control validation, and documentation updates.
- Coordinated vulnerability remediation by reviewing ACAS scan results, tracking POA&Ms, and partnering with engineering teams to resolve security findings.
- Conducted security control assessments using NIST SP 800-53 and DoD security requirements.
- Supported continuous monitoring (ISCM) activities by maintaining system security documentation and monitoring compliance.

- Collaborated with ISSMs, ISSEs, system owners, and engineering teams to support DoD 8510.01 compliance and Authority to Operate (ATO) requirements.
- Maintained System Security Plans (SSPs), security control narratives, and supporting documentation for audits and security reviews.

Senior System Administrator

ARMA Global (GDIT) | Fort Liberty, NC

Feb 2022 – Apr 2023

- Served as a primary technical point of contact for enterprise users, resolving system issues while collaborating with multiple teams to ensure timely service delivery.
- Managed Active Directory user accounts, permissions, and Group Policy administration.
- Administered SharePoint sites, permissions, and content updates.
- Utilized Jira to manage, prioritize, and resolve technical issues across enterprise IT operations.
- Created and maintained technical documentation and standard operating procedures (SOPs) using Confluence.
- Imaged and deployed desktops, virtual machines, mobile devices, Cisco phones, and user workstations.
- Monitored system performance and resolved hardware, software, and network connectivity issues.
- Supported daily IT operations while improving operational efficiency through documentation and process standardization.

Information Technology Specialist (25U) | Sergeant (E-5)

United States Army | Fort Liberty, NC

Oct 2015 – Oct 2020

- Led and mentored junior Soldiers while overseeing daily IT support operations.
- Supported IT operations and information systems for more than **150 end users** in a high-tempo operational environment.
- Managed Active Directory accounts, SharePoint access, and information management functions.
- Supervised **10+ Communications Security (COMSEC) Custodians**, ensuring compliance with security procedures and zero loss of classified material.
- Maintained accountability for communications and cryptographic equipment valued at more than **\$400,000**.
- Developed standard operating procedures for IT support and help desk operations, contributing to the timely resolution of **100+ technical support requests per month**.
- Installed, configured, and maintained communication systems, workstations, and secure network infrastructure.
- Coordinated with multiple technical teams to resolve operational issues and support mission readiness.

EDUCATION

Bachelor of Applied Science – Information Technology Security (In Progress)

Campbell University

Microsoft Software & Systems Academy

19-week Microsoft technical training program focused on software development fundamentals, C#, ASP.NET MVC, SQL Server, and enterprise technologies.

CERTIFICATIONS

- **CompTIA Security+ ce** (Active)
- Microsoft Certified: Azure Fundamentals (**AZ-900**)
- Microsoft Technology Associate (MTA): Software Development Fundamentals

SECURITY CLEARANCE

Active Top Secret / Sensitive Compartmented Information (TS/SCI)
